

Insulated Pozidriv Screwdrivers

boddingtonselectrical
Sicame Group

Application:

- Pozidriv screwdrivers are specifically designed for use with Pozidriv screws, which are a type of cross-head screw similar to Phillips screws but with additional notches between the arms of the cross. The design of Pozidriv screws provides better torque transfer, reduces cam-out (slipping out of the screw head), and allows for more secure fastening.

Features:

- High torque softgrip screwdrivers for pozidrive screws
- Precision hardened Chrome-Vanadium-Molybdenum steel blade
- Blade insulation directly moulded onto the blade
- Ergonomic, softgrip multi-component handle
- Tips and dimensions acc. to DIN 7438, ISO 8764-PZ
- Insulated according to IEC 60900:2018, usable up to 1000 V AC/1500 V DC

Insulated Pozidriv Screwdrivers

Reference	Description	Profile Style	Blade Length (mm)	Overall Length (mm)	Weight (g)
114300	Insulated Pozidriv Screwdriver	PZ0	60	145	41
114301	Insulated Pozidriv Screwdriver	PZ1	80	175	64
114101	Insulated Pozidriv Screwdriver	PZ1	150	250	76
114201	Insulated Pozidriv Screwdriver	PZ1	250	345	91
114302	Insulated Pozidriv Screwdriver	PZ2	100	210	97
114102	Insulated Pozidriv Screwdriver	PZ2	150	260	110
114202	Insulated Pozidriv Screwdriver	PZ2	250	360	136
114303	Insulated Pozidriv Screwdriver	PZ3	150	270	172
114304	Insulated Pozidriv Screwdriver	PZ4	250	320	241

It's important to use a Pozidriv screwdriver with Pozidriv screws, as using a Phillips screwdriver on a Pozidriv screw can result in poor grip and damage to both the tool and screw head. The distinguishing feature of a Pozidriv screw is the additional smaller lines or notches radiating from the centre of the cross.
